

Zenith

Exterior Solar Screen

Engineered for smarter installation and better performance.

ZENITH Exterior Solar Screen

Zenith was designed with installers in mind. From its snap-in brackets to the Connect & Go motor system, every detail reduces steps and saves time. Bottom access to the cassette makes tight-space installs easier and safer, while preassembled components streamline the entire process. Built for high winds and challenging conditions, Zenith combines reinforced structural elements with a sleek, modern design. The enlarged bottom bar and reengineered endcaps deliver superior stability and fabric protection, ensuring long-lasting performance without sacrificing aesthetics.

Zenith's proprietary roll tube and advanced spring technology guarantee a smooth, taut finish every time. The zipper-based fabric attachment and hidden weld create a clean look, while upgraded ball bearing idlers provide quiet, reliable operation—even at larger sizes.
